

# Let the Sunlight In Program

## An exciting program for dealers and new clients!

SunCentral now announces its “Let the Sunlight In” program which allows customers to test SunCentral technology in their facility under an existing skylight or atrium. Simply place a purchase order for up to 5 SunBeamer™ 100s and receive 120 days dating on the order. If, within that time, the customer is not satisfied with performance they can return the SunBeamers™ at no charge.

SunCentral is a leading supplier of premium lighting and daylighting products that surpass traditional technology by delivering both sunlight and LED light into the core of multi-story buildings. Utilizing full spectrum sunlight, SunCentral increases comfort, well-being, and productivity in offices, hospitals, and retail facilities. SunCentral products have been successfully installed at locations in Canada, The United States and Germany.

SunCentral enables lighting designers and architects to illuminate with natural, full spectrum light. This new program offers facility managers a unique opportunity to validate SunCentral's innovative sunlighting technology by installing it in their own facility.

### PROGRAM HIGHLIGHTS

- Risk free trial of SunBeamer™ 100 product
- Full spectrum sunlight delivered deep within your building
- Easily installed in skylights or atria
- Optional lenses and diffusers available for any distribution
- Includes mounting ring and field commissioning/training
- 120 days dating
